SUBARU BRZ

STAY CLOSE TO WHAT MATTERS.

Life can't be all work and no play. You need to mix in a little fun too. The SUBARU BRZ was engineered to deliver bite-sized slices of joy whenever, wherever. With a pure sports car driving experience that adds excitement to every drive, the SUBARU BRZ can bring joy to your life, daily. It gives you closer connection to the simple joy of driving through every turn, so you don't lose touch with what matters most—enjoying life as much as possible.

RIDE THE WIND.

The sculpted proportions of the SUBARU BRZ not only draws attention but is also designed to harness the wind. Around every corner, its slippery silhouette seems to glide through the air as it conceals the combination of lightweight material used to form the SUBARU BRZ. The subtle aerodynamic advantages, along with its overall weight further contribute to the nimble and direct handling response.

Aerodynamic Bodywork

Its fluid lines aren't just for looks. Thanks to advanced design, the SUBARU BRZ is able to achieve a slippery coefficient of drag of just 0.27*.

* Value is a measurement of the vehicle equipped with aero package option in accordance with standard measurement of Fuji Heavy Industries Ltd.

TRUE BALANCE FOUND.

The foundation of the astonishing handling characteristics of the SUBARU BRZ comes from its rigid chassis. The intelligent design allows the SUBARU BOXER engine to sit lower—and thanks to its lightweight and balanced chassis, this creates a lower centre of gravity that further promotes excellent manoeuvrability and stability for a driving experience that is truly personal.

Performance Suspension

A fully independent suspension brings our every bit of agility and responsiveness the SUBARU BRZ has to offer. MacPherson-type front struts help maximise rigidity and a feeling of direct control by allowing the SUBARU BOXER engine to be placed even lower in the chassis. And a double-wishbone design rear soaks up bumps without sacrificing control.

Torsen* LSD

Exhilarating precision in everycorner–that's what sets a SUBARU BRZ apart. An advanced Torsen limited-slip differential–the same type of LSD found on the high-performance WRX STI–helps you stay on your line during a high-speed turn whilst enhancing your comfort and control on rough roads.

* Torsen is a registered trademark of JTEKT Corporation.

BRZ

THE CENTRE OF CONNECTION.

Driver-centric ergonomics personalise every drive. With a steering wheel that fits perfectly in the palm of your hands and an optimally placed short-throw shifter, you can take control of the SUBARU BRZ with intuitive fluidity. And with sport-design instrumentation, you'll immediately get the information you need most.

Responsive Transmission

A 6-speed manual transmission helps you get fully engaged with driving, thanks to a short stroke and superb shift feel. The available 6-speed automatic features paddle shifters, downshift blipping control, and two distinct shift modes for performance that always suits your mood.

WHERE PASSIONS UNITE.

The minute you sit in a SUBARU BRZ, you'll feel it. Every performance enthusiast will intuitively understand the way the interior is focused on ultimate driver connection and control. And whilst the deep bolsters and Alcantara®*¹ inserts give you excellent support during high-performance driving, the folding rear seats allow you to carry more to do more.

Leather/Alcantara®*1 Trim*2

Available with premium leather trim and grippy Alcantara^{®*1} inserts, performance-design front seats help you keep your position whilst cornering. They also feature a lowered seating position to bring the vehicle's centre of gravity down even farther.

*1 Alcantara is a registered trademark of Alcantara S.p.A. *2 Optional.

Folding Rear Seats

You wouldn't expect this much utility from a pure sports car, but with the rear seats folded, there's enough room for a set of racing tyres or two golf bags.

SPORTS CAR DRIVETRAIN

Laid out symmetrically, the SUBARU BOXER engine puts the crankshaft perfectly in line with the driveshaft for tremendous stability and dynamic agility. And the rear-wheel drive configuration allowed us to move the engine farther back and gives you precise control over your cornering attitude. We combined this agile platform with a newly designed quick-ratio steering system that's tuned to react with astounding precision and immediacy to your input.

SUBARU BOXER Engine

The SUBARU BOXER engine powers the SUBARU BRZ to new heights of precision and excitement. We've placed this 2.0-litre engine lower, made it more compact and moved it closer to the driver. It's the first engine of its kind to feature direct and port fuel injection technology, which enhances both its responsiveness and fuel efficiency. It's a one-of-a-kind design that offers a new kind of satisfaction.

Power Output

This 200 PS engine loves to be revved. With a high redline, a flat torque curve and 100 PS per litre, you'll be sure there's plenty of power no matter what rpm you're at. You'll have less impact on the environment, and more excitement at your disposal.

MAX OUTPUT: 147 kW (200 PS) / 7,000 rpm

MAX TORQUE: 205 Nm (20.9 kgfm) / 6,400 - 6,600 rpm

7.8 lit./100 km* (6MT), 7.1 lit./100 km* (6AT)

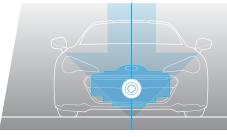

FUEL CONSUMPTION:

CO₂ EMISSIONS: 180 g/km* (6MT), 164 g/km* (6AT)

* Fuel consumption and CO_2 emissions: according to ECE R101-01.

Low Centre of Gravity

We challenged ourselves to give the SUBARU BRZ as low a centre of gravity as possible, because that means the most exciting handling possible. Every element of the car, from the flat, horizontally-opposed engine design to the roofline to the seat positioning, help give the SUBARU BRZ one of the lowest centres of gravity of any mainstream vehicle available.

16

High Visibility

A car that's a thrill to drive should also inspire confidence. Clever interior design gives you exceptional views from all angles—helping you have a greater command of your surroundings.

Vehicle Stability Control

This advanced electronic system monitors an array of sensors—including braking, steering and yaw sensors—to help keep you from losing control as you push the SUBARU BRZ to its limits.

Ring-shaped Reinforcement Frames

The SUBARU BRZ offers intense control and just as intense protection. Its frame design strengthens the passenger cabin from the roof to the doors, pillars and floor. This design, bolstered by generous use of hightensile steel, helps to dissipate impact energy away from the occupants in a collision.

Lightweight Body

Simplicity in design and extensive use of high-tensile steel has helped reduce weight whilst making the chassis more rigid and precise. What's more, an aluminium bonnet further lightens the vehicle, whilst bringing the centre of gravity even lower.

SRS* Airbags

Heightened control and visibility are elemental to the SUBARU BRZ. However, you'll also have the confidence of knowing that, should something unfortunate happen, you have front SRS* airbags, front-side and curtain SRS* airbags as standard equipment to help protect you from an impact. Also, the SUBARU BRZ comes standard with a knee SRS* airbag, which helps protect the lower extremities of the driver.

* SRS: Supplemental Restraint System. Effective when used in conjunction with seatbelts.

02

03

04

Headlamp Washers

Pop-up type washers use a high pressure spray to help keep the headlamps performing in poor weather.

Fog Lamps

Multi-reflector lamps emit a wide, flat beam that reflects less glare in fog, for added safety.

17-inch Aluminium Alloy Wheels

As lightweight as they are distinctive, every SUBARU BRZ comes with aluminium alloy wheels that reduce unsprung weight and sharpen your style.

Rear Diffuser

This performance-designed diffuser helps heighten aerodynamics and driving dynamics by simultaneously reducing drag and improving downforce.

05

Paddle Shifters

Standard with automatic transmission models, they allow you to execute crisp shifts with your fingertips.

<u>06</u>

Keyless Access with Push Button Start

Start your SUBARU BRZ without removing your key from your pocket or purse.

<u>07</u>

Dual-zone Automatic Air-conditioning

This advanced climate control system allows the passenger and driver to set different temperatures depending on their personal preference.

08

USB and Auxiliary Audio Input Jack

Plug in a USB-enabled device to play your music through the car's audio system or use the 3.5mm audio jack with just about any portable music player.
